

Pedro Ossorio Arana

Senior Product Designer — B2B SaaS, Fintech & Design Systems

Buenos Aires, Argentina | pjoa93@gmail.com | +54 9 11 3642 9457 | [linkedin.com/in/pedro-ossorio-arana](https://www.linkedin.com/in/pedro-ossorio-arana) | poa.ar

Product designer with 5.5+ years leading design for complex, regulated B2B platforms — agtech financing and banking-adjacent fintech at Nera, and multi-client e-commerce/SaaS at Balloon Group. Built and scaled design systems from the ground up (275+ components in production, shared ownership across 4 designers). I drive decisions from funnel and behavioral data, not opinion: I identified and resolved a critical drop-off step in Nera's highest-TPV capturing flow, cutting abandonment by 16%. Comfortable owning a problem from discovery workshop to shipped, instrumented feature, and pragmatic about using AI tooling (Cursor, Figma MCP, Claude) to move faster without losing design quality.

EXPERIENCE

Product Designer — Nera - Sept 2023 — Present

- Own and evolve Nera's design system end-to-end: 275+ components in production, maintained with shared ownership across a 4-designer team and consumed by engineering as a versioned npm package — Full component-to-code pipeline.
- Used funnel analysis in Amplitude to identify a critical drop-off point in the flow driving the company's highest transaction volume (TPV); redesigned the step and reduced abandonment by 16%.
- Shipped flows for a regulated, banking-adjacent platform — translating complex eligibility, payment, and transaction logic into interfaces that non-specialist users complete without friction.
- Prototype flows and wireframes to align design, product, and engineering before build, reducing rework and ambiguity at handoff.
- Use AI-assisted tooling (Cursor, Figma's MCP integration, Claude) inside the design-to-code workflow to accelerate component generation while keeping system consistency.

Lead Product Designer — Balloon Group - May 2022 — Sept 2023

- Led a team of 4 designers delivering B2B SaaS, e-commerce, and brand work for clients including a Chilean telecom/ISP and a Magento e-commerce build for Circle K.
- Built the agency's design system from scratch — identifying recurring patterns across unrelated client projects, securing leadership buy-in, and establishing a shared component library that cut redundant design and dev work across simultaneous projects.
- Ran discovery workshops directly with clients to scope requirements before design work began, and represented the agency's design capability through a self-built Webflow site.
- Delegated and reviewed team output against client expectations and brand/design standards across concurrent engagements.

Freelance & Contract Product/UI Design — Various Clients - Sept 2018 — Present

- Contract UI design for B2B and consumer products: redesigned an insurance app's core flows and built a stakeholder-facing prototype for a B2B business model pitch (Kinsu); expanded a design system and worked in sprints with a US-based team (PPL Events).
- End-to-end brand and e-commerce design and deployment (WordPress/WooCommerce) for independent clients (Ecoaqua, Oriens Energía), including full brand identity and digital strategy.

Business Analyst, E-mail Marketing — Dos Monos - Dec 2016 — Aug 2017

- Ran data-driven segmentation and A/B testing to improve conversion rates and revenue — early grounding in the metrics-first approach now central to product design decisions.

RELEVANT SKILLS

Design Systems: component libraries, design tokens, governance, Figma → code pipelines, Storybook

Product Process: discovery workshops, journey mapping, information architecture, wireframing, prototyping, A/B testing, agile

Data & Research: Amplitude funnel analysis, user testing, business analysis, conversion optimization

Tools: Figma (incl. MCP), Cursor, Claude, Adobe Illustrator, Miro, Notion, Jira, HTML/CSS, React

LANGUAGES

Languages: Spanish (Native), English (Professional)
